Re: Amended Specification for Application No. 10/547,665 filed
9/06/2005, Inventor: Herbert L. Stone conf # 7016

Gentlemen:

In an 8/1/07 letter, examiner George A. Suchfield required the referenced amended specification because the prior one did not provide any reference to the provisional application. Specifically, he wanted the Application #, 60/469,700, and the priority date, 5/12/03. These are included in the proper place in the enclosed amended specification.

Sincerely,

Herbert L. Stone
